To Whom It May Concern

The Wellman Group Ltd has been contracted by this organisation on a number of occasions since April 2005 after we purchased a building located at 128 Khyber Pass Road, Grafton, Auckland.

The initial project under taken was a major fit out, costing in the region of \$500,000, of our new building. We completed the purchase of the building in mid March 2005 and asked Wellman Group to complete the impossible task of a fit out so we could move in mid April. This deadline was achieved through the fantastic efforts of the company. Not only was the project on time but also on budget. No other construction company was willing to undertake this project with such a short time frame.

Since that first project we have used the company for a number of smaller projects and earlier this year the Wellman Group won a major tender process to install a new lift tower and new disabled toilet facilities at our Grafton premises. The total cost of the project was in excess of \$250,000. The age of the building undoubtedly offered many interesting challenges but we have once again seen the problem solving skills of The Wellman Group led by Shane Brady come to the fore.

We would also comment that in our opinion the many interactions necessary with the Auckland City Council were made much easier with the knowledge displayed by the employees.

We have no hesitation in recommending the Wellman Group as a construction company. Please do not hesitate to contact the undersigned should you require more information

Yours faithfully
